PROFILE

Third-year BSc (Hons) IT & Management undergraduate seeking Software Engineering, Business Analyst, and Project Management internships. Combines full-stack development (Java/Spring Boot, MERN) with CIMA-backed business analysis and Power BI reporting experience.

EDUCATION

University of Moratuwa BSc (Hons) in Information Technology & Management – GPA: 3.61/4.00	2024 – 2028 (Expected) Sri Lanka
Visakha Vidyalaya, Colombo G.C.E. Advanced Level – Business Stream (Z-score: 2.006)	Sri Lanka
Anula Vidyalaya, Nugegoda G.C.E. Ordinary Level – 9 Distinction Passes	Sri Lanka

CERTIFICATIONS

CIMA Diploma in Management Accounting (Dip MA) Chartered Institute of Management Accountants (CIMA), UK	Operational Level Completed
CIMA Certificate in Business Accounting (Cert BA) Chartered Institute of Management Accountants (CIMA), UK	Completed
Power BI for Beginners Microsoft, via Simplilearn	Certificate

PROJECTS

Interlink – AI-Powered Recruitment & Interview Management Platform Java, Spring Boot, React, PostgreSQL (Supabase), OpenAI API, Docker, CI/CD - Built an AI-based CV screening engine (OpenAI API) with a custom scoring algorithm weighting skills, experience, and education. - Architected the billing & subscription system: multi-tier plans, usage metering, and race-condition-safe quota enforcement. - Built an automated subscription lifecycle engine (Spring's task scheduler) and a role-secured support ticket system with JWT verification.	Second-Year Team Project
TalentLens – Recruitment & Workforce Analytics Dashboard Power BI, Power Query (M), DAX, Data Modeling - Built an end-to-end Power BI layer for Interlink: cleaned 10+ sources in Power Query with an 8-table star schema. - Wrote 15+ DAX measures covering funnel conversion, time-to-fill, cost-per-hire, and attrition. - Delivered a multi-page report surfacing sourcing-channel effectiveness and funnel drop-off by department.	Personal Companion Project
Pocketly – Full-Stack Personal Finance Tracker MongoDB, Express, React, Node.js, Tailwind CSS, JWT, bcrypt, ExcelJS, Recharts - Built and deployed a full-stack MERN finance tracker (Render, Vercel, MongoDB Atlas), live in production. - Engineered secure JWT authentication with refresh-token reuse detection, bcrypt hashing, and a password-reset flow. - Designed MongoDB aggregation pipelines, an automated recurring-transactions engine, and a multi-sheet ExcelJS/Recharts reporting suite. - Diagnosed a production SMTP failure and migrated the email pipeline to a REST-based provider (Brevo) with zero downtime.	Personal Project
Race-Track Circuit – IoT Sensor-Based Racing System React (Vite), Node.js, Express, WebSocket, Arduino/ESP32 - Built the full race-tracking website (React/Vite, Node/Express/WebSocket) with a live leaderboard and real-time stats. - Integrated a TCRT 5000 IR sensor at the starting line to detect the car and trigger real-time race data transfer to the website. - Configured a 1.8" SPI TFT display on the ESP32 to show live game timer and stats from the website.	First-Year Team Project
Quill – Blog Management System - Built a secure PHP/MySQL blog platform with hashed authentication, role-based access control, and full CRUD post management. - Enforced server-side session validation to block direct dashboard URL access by unauthenticated users.	Academic Project

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

IEEE WIE Student Branch Affinity Group, University of Moratuwa – FestX 2025 – Co-Chair Managed the Finance and PR Committees and coordinated cross-team tasks for the IEEE WIE UoM Inauguration, FestX 6.0.	Jul – Sep 2025
IEEE Student Branch, University of Moratuwa – MoraForesight 3.0 – Finance Committee Member Supported sponsorship pitching and cold-calling for MoraForesight 2025, contributing to event financial operations.	Nov 2024 – Aug 2025
Rotaract Club, University of Moratuwa Co-Chair, MentHer Initiative: led career-development programming for female undergraduates, managing event planning and partnerships. Co-Chair, Swim or Sink: organized a beginner swimming event, coordinating logistics and volunteers.	Oct 2024 – Feb 2025
Leo Club, University of Moratuwa Coordinated the design committee for Celestia cultural dinner.	

TECHNICAL SKILLS

Languages: C, Java, JavaScript, SQL, PHP
Web & Data: React.js, Node.js, Express.js, Spring Boot, MySQL, PostgreSQL, MongoDB, Power BI
Tools: Git, Docker, Figma, Jira, Postman, ExcelJS
